Forecast for Thursday 23 Feb 2023

Weather: Dry with clear periods at first before cloud spreads steadily east. Cloud reaches the great Glen by early morning as rain begins across western coastal ranges. This rain spreads steadily east through the morning, preceded by a little snow above 500m, rain becoming persistent and heavy across higher ground through the afternoon and evening.

Chance of cloud-free hill tops above 800m: 40% at first across eastern ranges, otherwise 20%.

Low cloud and visibility: Good visibility in the early morning with broken cloud above 600m. Cloud lowers to 400m during the morning when the visibility will fall to poor in rain becoming very poor in heavier falls during the afternoon and evening.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View

After a promising early morning cloud increases and lowers, strengthening winds and temperatures only slowly rising from below zero make conditions feel bitterly cold. Outbreaks of heavy rain in the afternoon lower the visibility and make navigation difficult.

Forecast for Friday 24 Feb 2023

Weather: Overnight rain will clear south as clear periods increase before dawn. After a frosty start, the day will be dry with sunny periods throughout.

Maximum wind: North or northwest 25-30mph gust 40mph.

Chance of cloud-free hill tops above 800m: 60% in the early morning gradually increasing to 80% by late afternoon.

Low cloud and visibility: Cloud will be broken at 600-700m at first but will slowly clear to scattered at 800-900m by the afternoon. Out of the cloud the visibility will be very good.

Temperature: **Glens:** Minus 1 Celsius rising to plus 6 Celsius.
At 800m: Zero to minus 2 Celsius.
Freezing level: 700m lowering to 400m by evening.
